## President's Message

**By: Mark Pickett**

### April President's Message

Summer is once again closing in upon us, as is the end of my term of service as your President. This is the time of year that most challenges those in our industry to be at their best.

Fortunately, the last three lunch meetings of this term were, and are, packed full of relevant information to help you all get through it. Last month we heard Mr. Mike Donovan review options for addressing the Outside Air stream that most challenges the designers of comfort HVAC systems. This month, Mr. Bob Frick, PE will continue with addressing compliance with ASHRAE 90.1 in those designs. Next month, Mr. Oscar Zuniga, PE will close with a discussion on Industry Ethics. By any account, that's a strong way to wrap up our programs for the year.

We'll be distributing the ASHRAE Membership Roster & Product Di-

rectories at this month's meeting, so please plan on attending to get yours... distribution individually always takes a bit longer.

During this month's Board of Governors meeting we conducted an impromptu round table to assist Mr. Travis McLeod on rounding out his slate of officers and such for the upcoming year. We'll be distributing ballots at this meeting for election of officers this month and identifying and bringing in those elected at the June meeting.

On June 2, 2006 is the Alamo ASHRAE golf tourney at the Quarry – Its not too late to sign up for teams and be a sponsor! Contact either myself or Fred Gleeson at HTS if you need information on that.

As always, there's a lot of movement and activity within the Alamo City. Thank you, for being a part of it all and making this chapter your

**See Sponsor form on page 6**

**Minutes for the April Chapter Meeting held at Oak Hills Country Club April 18, 2006**

The meeting was called to order by President Mark Pickett. After several announcements concerning Chapter business, Mark call for the attendees to introduce themselves.

Mark then introduced the speaker Mr. Mike Donovan with Heat Transfer Solutions, Inc. who gave a presentation on "Decoupling Outside Air Systems". Mike pointed out that most packaged HVAC equipment is not suitable for proper outside air treatment and that it is often advantageous to treat outside air introduced into a conditioned space with separate equipment.

Mark discussed several installations where problems had occurred and the solutions applied.

After a brief discussion the meeting was adjourned.
